

Welcome to Evolved Living

About EVE Park

Imagine a residential community designed around abundant green energy. Where two-car garages do not separate you from your neighbours. Where community greenspace is prioritized over driveways and fenced yards. Where you're living in a park, not a parking lot.

EVE - Electric Vehicle Enclave - Park is a new kind of residential community that shows us how we can live in a way that changes our relationship with the planet and with one another. The project will be built in the "forest city" of London, Ontario within the greater West5 community, one of North America's largest net-zero energy communities. It is connected to the Thames River park area, with access to many biking trails, golf courses — ideal for an active, outdoor lifestyle.

While other developments have sought out green energy solutions, EVE Park is revolutionary in its approach to community, its attention to exceptional quality of life, its inspiring design, its integration of nature and technology, and especially its forward-thinking approach to personal transportation.

*EVE Park is the first community of its kind:
a net-zero energy community designed for the future.*

84 Units Total

4

ONE BEDROOM UNITS

Woodfern

48

TWO BEDROOM UNITS

Bergamot, Indigo and Gooseberry
ground floor, and *Sumac*
elevated 2 bedrooms

32

Natural Light**

A round wooden coffee table with a light-colored top and a darker, horizontally-grained base. On the table sits a white tray with a pink inner circle, holding a small white pot with a green succulent. In the background, a patterned curtain with tassels is visible.

Suites

Live well, lightly.

Bergamot

TWO BEDROOM TOWNHOUSE

KEY PLAN

AREA: 1486 FT² / EXTERIOR: 164 FT²

Interior and exterior configuration varies by unit and specifications are subject to change without notice. See a sales representative for further information. Actual usable floor space may vary from the stated floor area.

GROUND FLOOR

SECOND FLOOR

Gooseberry

TWO BEDROOM
TOWNHOUSE

KEY PLAN

AREA: 1498 FT² / EXTERIOR: 155 FT²

Interior and exterior configuration varies by unit and specifications are subject to change without notice. See a sales representative for further information. Actual usable floor space may vary from the stated floor area.

GROUND FLOOR

SECOND FLOOR

Indigo

TWO BEDROOM TOWNHOUSE

KEY PLAN

AREA: 1312 FT² / EXTERIOR: 155 FT²

Interior and exterior configuration varies by unit and specifications are subject to change without notice. See a sales representative for further information. Actual usable floor space may vary from the stated floor area.

GROUND FLOOR

SECOND FLOOR

Sumac

ELEVATED TWO BEDROOM TOWNHOUSE

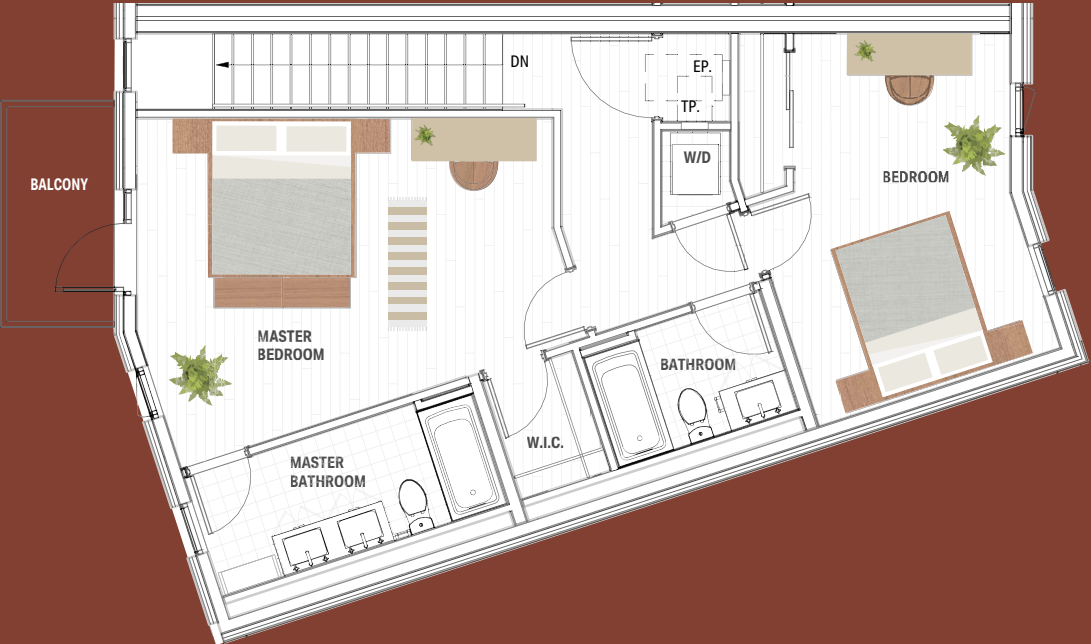

KEY PLAN

THE SUMAC / AREA: 1850 FT² / EXTERIOR: 96 FT²

Interior and exterior configuration varies by unit and specifications are subject to change without notice. See a sales representative for further information. Actual usable floor space may vary from the stated floor area.

EVE-CarTM

EVE Park's Exclusive Car Share Program

Just Drive EVE-Car™ will get you there.

Tailpipe emissions count for about 40% of the average Canadian's annual carbon emissions. By driving a Tesla EV, you eliminate all of that. By participating in a Tesla EV car-share, you are also spreading the embedded carbon of building a new vehicle across more than one driver. With EVE-Car™ you can go places, leave the guilt behind, and arrive in style.

Parking, regular preventive maintenance and overnight charging are all included. There are four different plans – to help you tailor your EVE-Car™ experience around your driving needs. No matter if it is a regular rental or an hourly rental for a family trip, your vehicle will be ready to go when you are!

EVE-Car™ subscribers will also have access to a fleet of Pedego eBikes. These high-end city-bike style e-bikes will be parked, maintained and charged overnight for EVE-Car™ subscribers who want to blend some more active transportation and fun into the way they get around.
